Material Safety Data Sheets

Material Safety Data Sheets contain safety information for dealing with hazardous substances.

In accordance with the European Writing Instruments Manufacturers' Association (EWIMA) **we do not prepare** material safety data sheets for finished products such as pencils, markers, highlighters, fibre-tip pens, fineliners, gel liners, ballpoint pens, erasers or chalks as they do not represent hazardous materials or preparations as defined by European chemical law.

Our Product data sheet, however, contains all necessary data relating to components for example of inks or leads, plastics used for housing, as well as conformity with the relevant standards.

In case of further questions regarding our products please contact our application experts:

Service-Hotline: 0911 93 65-888
E-Mail: service@staedtler.de

Kind regards

STAEDTLER Mars GmbH & Co. KG
